New EC centrifugal blowers dual inlet

Energy savings, convenient control and low noise **Cylindrical rotor fans in EC technology**

Saving energy is becoming an ever increasingly important topic these days. Especially when it comes to air-conditioning and ventilation technology, great potential savings can be achieved by using energy-efficient fans. For this reason, motor and fan specialist ebm-papst Mulfingen has recognised the issue, and has developed a complete series of dual-inlet, direct-driven cylindrical rotor fans with efficient EC technology. Without changing the design of the unit, this allows a conversion from a conventional fan with asynchronous motor to modern energy-saving technology.

The advantages of EC fans speak for themselves. Because the electronically commutated external rotor motor is integrated within the forward curved impeller, the installation dimensions are reduced and there is no longer any need for the commonly required belt drive between the motor attached on the outside and the impeller. This reduces the fan dimensions always desirable for ventilation and air-conditioning technology as well as the associated installation effort.

Furthermore, the electronically commutated motors are extremely quiet and operate at efficiencies of up to 90 %. Thus they attain significantly higher values than most voltage-controlled asynchronous motors, which have typical efficiencies of between 30 % and 60 %. At the same operating point, therefore, the power consumption of the EC fans is considerably less.

With integrated motor electronics, the EC fans can be easily speed controlled via a 0-10 V signal or by the use of a potentiometer. As an option up to three air flow values can be programmed in "Constant Flow" mode. This means that if the system resistance changes, for example due to polluted filters, the fan keeps the programmed air flow by changing the speed automatically.

Depending on the motor type used, the double inlet fans with state-of-the-art EC technology cover almost every conceivable application area. You can choose between eleven sizes with drive outputs between 85 W and 3 kW. Thus a customised solution is available for virtually any application, including compact air handling units, air curtains for doors and gates, fan coils, air heaters for factory buildings or as a cooling fan for forced cooling of power converters, generators or telecommunications systems.

EC centrifugal blowers

dual inlet, Ø 133

- **Material:** Housing: Galvanised sheet steel
Impeller: Galvanised sheet steel
Rotor: Galvanised
Electronics enclosure: Die-cast aluminium
- **Direction of rotation:** Clockwise, seen on rotor
- **Type of protection:** IP 44
- **Insulation class:** "B"
- **Mounting position:** Any
- **Condensate discharges:** Rotor-side
- **Mode of operation:** Continuous operation (S1)
- **Bearings:** Maintenance-free ball bearings

- **Approvals:** VDE, UL, CSA; CCC, GOST is applied for
 - Line undervoltage / phase failure detection
 - Motor current limitation
 - Over-temperature protected electronics / motor
 - Locked-rotor protection
 - Soft start

Mass of centrifugal blower

Centrifugal blower with flange

kg

D3G 404-BB02 -03

56,5

EC centrifugal blowers

dual inlet, Ø 454 (18")

- **Material:** Housing: Galvanised sheet steel
Impeller: Galvanised sheet steel
Rotor: Coated in black
Electronics enclosure: Die-cast aluminium
- **Direction of rotation:** Clockwise, seen on rotor
- **Type of protection:** IP 54
- **Insulation class:** "F"
- **Mounting position:** Shaft horizontal
- **Condensate discharges:** Rotor-side
- **Mode of operation:** Continuous operation (S1)
- **Bearings:** Maintenance-free ball bearings

Nominal data

Type	Motor	Curve	Nominal voltage VAC	Frequency Hz	Speed/rpm	Max. power input ⁽¹⁾ W	Max. current draw ⁽¹⁾ A	Min. back pressure Pa	Perm. amb. temp. °C	Electr. connection p. 45
D3G 454	M3G 150-NA	Ⓐ	3~ 400	50/60	660	2900	4,50	150	-25..+40	M1)

subject to alterations

(1) Nominal data in operating point with maximum load

- **Technical features:**
 - PFC (passive)
 - Control input 0-10 VDC / PWM
 - Output 10 VDC max. 10 mA
 - Alarm relay
- **EMC:** Interference emission acc. to EN 61000-6-3
Interference immunity acc. to EN 61000-6-2
Harmonics acc. to EN 61000-3-2/3
- **Leakage current:** < 3.5 mA acc. to EN 61800-5-1
- **Cable exit:** Variable
- **Protection class:** I
- **Product conforming to standards:** CE
- **Approvals:** VDE, UL, CSA; CCC, GOST is applied for
 - Line undervoltage / phase failure detection
 - Motor current limitation
 - Over-temperature protected electronics / motor
 - Locked-rotor protection
 - Soft start
